# Saifeleslam Elsayed

Giza, Egypt • saifeleslamelsayed@gmail.com • 01017318281 • LinkedIn • Portfolio

## Education

**San José State University, College of Engineering** — San Jose, CA, USA, Jan 2022 - May 2022
Exchange Student, GPA: **3.925/4.00**

**Cairo University, Faculty of Engineering** — Giza, Egypt, 2018-2023
B.Sc. in Computer Engineering, GPA: **3.26/4.00**

### Honors & Awards

- **Higher Education Initiative Scholarship,** Awarded a full scholarship for the B.Sc. in Computer Engineering, including intensive English and professional-skills training; received the Awesome Student Award during the final semester.

## Work Experience

**Avidbeam Technologies, Full Stack Engineer** — Internship | Aug-Sep 2023; Part-time | Sep 2023-Jul 2024; Full-time | Jul 2024-Present; Cairo, Egypt (Remote)

- Built and scaled AI-powered video-analytics systems using Ruby on Rails, React, Next.js, MongoDB, Elasticsearch, Sidekiq, and Action Cable.
- Architected multi-tenancy and cluster federation across databases, search indexes, real-time connections, background workers, and gRPC services.
- Designed a resumable production migration for 70 million+ records using batched Sidekiq jobs and a dedicated reindexing queue.
- Built resilient bulk-processing and media-processing workflows with retries, recovery, asynchronous execution, and real-time progress reporting.
- Developed advanced alarm-management features, including custom sounds, user preferences, authorization, feedback, archiving, and restoration.
- Built timezone-aware, multilingual profile-history reports and asynchronous exports for face and vehicle data.
- Integrated Authentik, MQTT, NATS, Kafka, webhooks, and external authentication services.
- Optimized high-volume APIs using Redis caching, database indexes, improved Elasticsearch queries, and reduced serialization work.
- Improved reliability through RSpec tests, OpenAPI/RSwag documentation, Sidekiq monitoring, and production troubleshooting.

**Thaat Home Healthcare Services, Freelance Full Stack Engineer** — Jul 2026 - Present; Riyadh, Saudi Arabia (Remote)

- Own frontend and Ruby on Rails backend development for a healthcare-services platform.
- Build CMS products and REST APIs serving patients, healthcare providers, branches, and internal operations.
- Develop a responsive medical-tracking map and location-based services.
- Manage AWS deployments using Docker, GitHub Actions, ECR, EC2, and S3.
- Integrate Gallabox automation, payment gateways, and push notifications.

**Cairo University, Faculty of Engineering, External Teaching Assistant** — Sep 2024 - Jul 2025; Giza, Egypt

- Assisted students with Introduction to Database Management Systems and Software Engineering.
- Supported labs, assignments, office hours, grading, and course-material preparation.

**Hoopoe Digital, Web Development Intern** — Jul 2022–Sep 2022; Cairo, Egypt

- Contributed to an analytics platform and indoor-mapping application using React and TypeScript.
- Created configurable forms for map administrators and reusable D3.js data-visualization components.

**Bosta, Quality Control Intern**

- Applied structured testing across web applications, mobile applications, and APIs in an Agile environment.
- Documented test cases and results in Jira, tested APIs with Postman, and validated MongoDB records using 3T Studio.

## Software Projects

**Diet & Wellness Platform, Backend Engineer | 2026**

- Built secure Node.js and Express REST APIs for assessments, personalized results, recipes, articles, and subscriptions.
- Implemented JWT and Google authentication, role-based authorization, verification, and account recovery.
- Integrated Paymob payments, Cloudinary uploads, and bilingual content.
- Deployed using Nginx, PM2, Cloudflare, HTTPS, and GitHub Actions.

**Ceramica Mayourca, Frontend Engineer | 2025**

- Delivered a responsive, multilingual ceramics-commerce experience using Next.js and React.
- Integrated APIs for catalogs, search, offers, sellers, news, and order workflows.
- Added English, Arabic, and French localization, RTL support, persistent themes, map search, filtering, validation, and order tracking.

**BuyMe E-commerce Platform (Learning), Full Stack Project | 2024**

- Built customer and administration experiences using React, Node.js, Express, and MongoDB.
- Implemented product management, filtering, shopping carts, purchasing, cancellation, and order tracking.
- Integrated Cloudinary image management and SendGrid password recovery.

**Opinion Pilot, Graduation Project | 2022 - 2023**

- Built an opinion-mining platform that extracts sentiment, quotations, summaries, and insights from news, blogs, and social media.
- Developed the application using React, Python, Flask, NLP, and machine-learning techniques

## Skills

**Backend:** Ruby, Ruby on Rails, Node.js, Express.js, Python, Flask, REST APIs, gRPC, Protocol Buffers
**Frontend:** JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Chakra UI, D3.js
**Data:** MongoDB, Elasticsearch, SQL, Redis, Mongoose
**Distributed and real-time systems:** Sidekiq, Action Cable, WebSockets, Kafka, NATS, MQTT, webhooks
**Cloud and DevOps:** AWS, EC2, ECR, S3, Docker, Kubernetes, Nginx, PM2, Cloudflare, GitHub Actions
**Testing and tools:** RSpec, RSwag/OpenAPI, Git, GitHub, GitLab, Postman, Jira, Trello
**Languages:** Arabic - Native; English - B2

## Leadership & Activities | 2019 - 2024

- **Head |** STEM for Sustainability event startup pitching head.
- **Organizer |** Sawiris Scholarship contract agreement conference **&** HEI's Graduation ceremony twice.
- **Vice-head |** Logistics team, SuccessHunter2020 Educational Summit.
- **Initiative leader |** Community Service initiative teaching students Microsoft Office.
- **Instructor |** AYP Technology team **&** Resala's literacy project **&** English camp for school students.
